Rodstation Superbright HD Camera Kit

Thank you for purchasing the Rodstation Superbright High Definition Camera Kit. This handbook will help you to operate the DVR and 18 Metre Wired Camera.

Rodstation is only responsible for maintaining and repairing the issues arising from correct use of the product. Rodstation are not responsible for any personal data deleted, lost or damage caused by wrong operation, product repair or any other causes. We are also not responsible for any other indirect loss caused by incorrect use, damage or failure to follow instructions. In the event of a warranty claim please download and complete a warranty return form which can be downloaded at www.rodstation.co.uk/warranty/.

IMPORTANT INSTRUCTIONS

- ENSURE that the camera is connected to the monitor when turning on the system
- When lowering the camera into a flue from above ensure the camera is lowered whilst connected to rods
- DO NOT connect the rods to a power drill when the camera is attached, this will result in damage to the cable
- TO ENSURE excessive tangling of the cable is prevented check the direction the camera is positioned within the flue, keep as central as possible and keep the cable as straight as possible.

Notes

Dear customer, thank you for choosing our products.
Please read the following instructions carefully before using:

- Must not be used in high temperature or a high humidity environment, 0~40℃ is the best working temperature for the DVR.
- Avoid putting the DVR in direct sunlight.
- Please insert or take out the SD card only after the DVR power is turned off.
- Please do not dismantle the DVR without authorization. If you have a query, please contact us.
- Please do not change or poke the battery or place the battery close to fires due to risk of explosion.
- We suggest our customers copy any data in case of any loss caused by unstable power supply.
- When inserting the SD card, please make sure the inserting direction is correct. Otherwise it will damage the card slot.
- Do not use this product to violate others' privacy. Monitoring others' activities without consent is illegal and this product is not designed and manufactured for such purpose.
- Do not use this product for any illegal activities. We shall not be responsible for any consequences of illegal acts committed by the user.

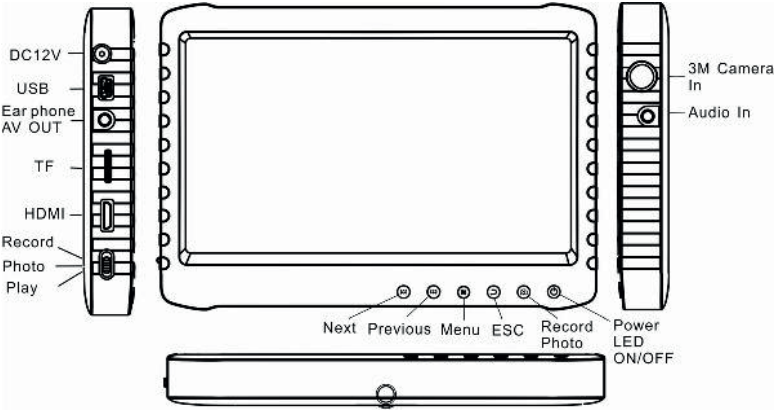
Buttons & Interface



Tips for symbols

Installation of Camera

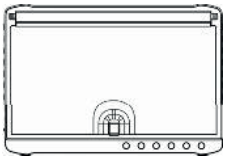
Connect the five core aviation plug of camera to the DVR unit ensuring the red dot on the plug is pointing towards the back of the DVR. Press " " to turn on LED light, Press " " again to turn off the LED light.

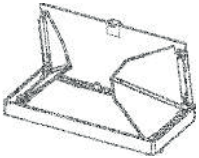
Connect the camera ball to a 1/2" Whitworth rod fitting

Attaching & removing the Sunshade Cover

The bottom of sunshade cover has 4 buckle pins. Please aim them at the button holes on monitor and push gently to load the cover into position. If you need to remove the cover just gently push it to the opposite direction.

To open the sunshade cover push up the button in the middle of the front cover.





Charging the DVR

1. Notice the battery capacity symbols before charging:

Tips: The possible reason for being unable to power on monitor is battery running out. Please operate it after charging by the AC adapter or PC.

2. How to charge

Charge 4~6 hours for fully charged. Unplug the charger until the battery status is full.

Note:

A. This charger is for this machine use only. Do not leave the charger in humid environment. Unplug the charger and keep it safe in the camera case after charging. Do not repair or modify the charger.

B. For better performance, please charge the brand new machine for more than 6 hours but less than 10 hours for the first time. New battery will reach its best performance after a few times full charge and discharge.

C. If you may not require the camera for a long period of time, it is recommended to charge the monitor every 2~3 months and then keep it switched off.
